

HAND MIXERS

Two paddles All materials

Hand-operated mixing
in its best form:
The new Collomix
Xo-R duo forced-action mixers

Features

· Ergonomically shaped handles ·

· Electronic switch ·

· HEXAFIX quick coupling ·

· Compulsory mixing effect ·

· Rubber buffers ·

· Reliable ·

Hand mixers *Xo-R duo*

- Counter-rotating mixing tools ensure intensive mixing of even the heaviest materials in the shortest possible time – that's the nature of forced-action mixing!
- Easy to guide in the material as there is no counter-torque acting on the operator via the paddles
- Maximum output thanks to the high-performance gearbox and motor
- Sensitive speed development via electronic switch
- More functionality in operation, such as the practical rubber buffers for setting it down gently
- The Xo-R duos support your back while working due to their adjusted working height
- Sturdy and durable, even in the toughest conditions
- Reversal of the mixing effect via simple exchange of the mixing tools. With the Hexafix quick coupling, this happens fast.
- For heavy materials, you mix from bottom to top; for soft and liquid materials, you mix from top to bottom
- 2-year warranty
